TSS Technologies new boring mill on display at IMTS 2010

We are proud to unveil our new BP-150 boring mill being displayed at the IMTS 2010 show in Chicago. The machine is expected to be installed and operating in early November.

This planer type horizontal boring and milling machine with rotary table is known for accurate movements and reliable accuracy. Spindle designed for optimum high speed and accuracy.

Travel:

X = 160"

Y = 120"

Z = 60"

V = 28"

About TSS Technologies:

TSS Technologies is a full service provider of Machining, Welding, Engineering, Assembly, Testing and Validating.

Our experience with complex machining and assembly processes gives TSS customers the flexibility of having the most difficult projects performed under one roof. The diverse manufacturing capabilities offered at TSS eliminate the need for customers to use several specialty facilities.

TSS Technologies

NEWS

For customers looking for complete design, weld, fabrication, machining, electrical design, programming, testing, and assembly, TSS is a nationally recognized leader in high-quality, high-value work.

Our engineers, with years of experience in a wide variety of industries, will develop your concept into a working design or build from your drawings. From there, TSS is equipped to take your project from drawings to fabrication and assembly. Our experience ranges from the close tolerance requirements of high speed converting and packaging machinery to meeting regulatory requirements for medical devices.
