TSS Technologies, Inc.
8800 Global Way
West Chester, OH 45069

Dear John:

As you know we currently have two of your Ergo Lifter devices in our facility with one more on the way. With just under a year with both machines in operation, I can tell you that we have been extremely impressed with the system. We have seen up to a 25% increase in output from each of our blank die cutting stations. Our operators actually feel better when their shift is over and are much more willing to work overtime when needed. I am also happy to report that we have had zero reported accidents in the two areas where the Ergo Lifter has been installed.

I would like to thank you again for delivering on your commitments. If you are ever in need of a recommendation or referral, I would be more than happy to do so. In fact, you may have potential customers call me directly for my feedback if necessary.

Thank you again and the best of luck on this new product. I think you have a winner.

Sincerely,

A handwritten signature in black ink, appearing to read "Terry Molique", is written over a faint, illegible background.
